

Aug. 11, 1919.

Messrs. Skeen & Skeen,

Ogden, Utah.

Gentlemen:

Your communication of Aug. 5, 1919, enclosing copy of the Geddes Decree and requesting this office to compute the capacities of the various discharges set forth in said decree, received.

In reply will state that while this is a matter that does not strictly come within the duties of the State Engineer we have, nevertheless, in this case taken the time and trouble to compute the capacity of these ditches for you. They are as follows:

Plain City Irrigation District	91	Sec. Ft.	
North Ogden Irrigation Co.	21	" "	
Ogden Bench Irrigation District	5.5	" "	
Liberty Irrigation Co.	78	" "	
Eden Irrigation District	32.5	" "	
Huntsville Irrigation District	83	" "	
Huntsville Mountain Irr. District	20.7	" "	
Lynne Irrigation Co.	29	" "	
Lynne Irrigation Co.	182	" "	(If the fall
			in this ditch is intended for .11 per
			100 ft. instead of 11 ft. per 100 ft.
			the discharge is 24 sec. ft.)
Ogden City Ditch	.7	Sec. Ft.	
Mound Fort Ditch	46	" "	
Harrisville Ditch	85	" "	
Smith, Schade, Munson & Peterson Ditch	5.8	" "	

In the case of the Eden Irrigation District Ditch and the Mound Fort Ditch the fall specified is 64 ft. and 54 ft. per 100 ft., respectively. We have taken this to be an error and that the falls intended are .64 and .54 per 100 ft., respectively.

Yours very truly,

State Engineer

CJU-F.
